AI/ML Engineer and Full-Stack Developer specializing in GenAI, RAG, and modern web applications.

EDUCATION

BML Munjal University <i>B.Tech in Computer Science, Specialization in Data Science</i>	Gurugram, Haryana <i>Sep 2022 – May 2026</i>
---	---

EXPERIENCE

Junior AI/ML Engineer <i>Knowledge Synonyms - Digital Enterprise</i>	July 2026 – Present <i>Noida, Uttar Pradesh</i>
- Build AI-powered e-learning systems that transform unstructured documents into interactive training courses using LLM-driven workflows. - Develop RAG pipelines with embeddings and vector similarity search for semantic retrieval and contextual intelligence across course content. - Developed SVASU, an AI-powered authoring platform that converts PDFs and presentations into structured courses using automated extraction, LLM-driven modularization, semantic search, and AI-generated assessments. - Engineer AI services using Node.js, React, and PHP/CodeIgniter, including automated SCORM 1.2/2004 and Web course publishing.	
Full Stack Development Associate Intern <i>Knowledge Synonyms - Digital Enterprise</i>	Feb 2025 – July 2026 <i>Noida, Uttar Pradesh</i>
- Developed full-stack web applications across the SDLC using Angular, Node.js, Express.js, and MySQL. - Built secure REST APIs with JWT and role-based authorization, including OCR-powered expense tracking and examination management platforms.	

PROJECTS

DevMatch <i>Angular, Node.js, Express.js, MySQL, Groq AI</i>	June 2026
- Built an AI job-matching platform aggregating listings from JSearch, Adzuna, Arbeitnow, and SerpApi with deduplication and profile-based scoring. - Developed LLM-powered resume parsing and recruiter workflows for candidate ranking, skill matching, and CSV export.	
Examination Management System <i>Angular, TypeScript, Node.js, Express.js, MySQL</i>	Apr 2026 – May 2026
- Architected a full-stack assessment platform with separate admin and student portals, JWT authentication, and role-based authorization. - Built timed assessments with question randomization, multiple question types, automated evaluation, and administrative analytics.	
Expense Tracker <i>Angular, Node.js, Express.js, MySQL, Tesseract.js, Chart.js</i>	
- Built a full-stack expense management application with CRUD operations, receipt OCR, and category-wise spending analytics. - Implemented Tesseract.js to extract expense details from uploaded receipts and Chart.js for interactive financial visualizations.	

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL, HTML, CSS
Frameworks: React, Angular, Node.js, Express.js, CodeIgniter 4, LangChain
AI/ML: LLMs, RAG, Prompt Engineering, Vector Embeddings, Semantic Search, Hugging Face, Groq AI
Tools: MySQL, MongoDB, Git, GitHub, Postman, SCORM 1.2/2004
